Total Client Investment: Cost of shares directly purchased and still held. Does not include shares purchased through reinvestment.

Cumulative Investment Return: Estimated Market Value minus Total Client Investment. Cumulative Investment Return is the dollar value of the capital appreciation (depreciation) of all shares purchased and still held, including shares acquired through reinvestment of dividends and distributions, which may be greater or less than the actual income distributed.

Market Timing: Merrill Lynch's policies prohibit mutual fund market timing, which involves the purchase and sale of mutual fund shares within short periods of time with the intention of capturing short-term profits resulting from market volatility. Market timing may result in lower returns for long-term fund shareholders because market timers capture short-term gains that would otherwise pass to all shareholders and due to increased transaction costs and fewer assets for investment due to the need to retain cash to satisfy redemptions.

Unrealized Gain or (Loss): Estimated Market Value minus Total Cost Basis (total cost of shares directly purchased and still held, as well as cost of shares acquired through reinvestment). Provided for Tax Planning purposes only and is not applicable to retirement accounts.

Initial Purchase: Date of your initial investment in this fund.

Some prices, current values and income estimates may be approximations, resulting in gains and losses not being accurately reflected. Unrealized gains and/or losses are computed from the supplied cost basis data and may not be accurate for tax reporting purposes. Items for which a cost basis was not available as of the statement period ending date are indicated by the symbol N/A. The total gains and/or losses do not reflect positions which we do not have cost information. Please contact your Financial Advisor if you believe any cost basis related data is inaccurate or if you require additional information.

Estimated Annual Income ("EAI") and Estimated Yield ("EY") are estimates only and do not indicate actual income or performance of investments. EAI and EY for certain types of securities could include a return of principal or capital gains, in which case the EAI and EY would be overstated. As EAI and EY are estimates, the actual income and yield might be lower or higher than the estimated amounts. EY reflects only the income generated by an investment and it does not reflect changes in its price, which may fluctuate.

Advantage Bank Deposits

(NOT COVERED BY SIPC)

As described in the ABD Program's Terms & Conditions, the current yield is based on the average daily balance during the prior month's interest cycle; interest cycles run from mid-month to mid-month. Client may elect to liquidate any cash investment option at any time by contacting his/her Financial Advisor.

For tax reporting purposes, Fixed Income ADJUSTED COST reflects calculations using the "Straight-Line Basis" to reflect amortization of cost for Fixed Income securities purchased at a premium and/or accretion of cost for Fixed Income securities purchased at a discount. The formula is not applied to Foreign Bonds or Certificates of Deposit. In addition, call features may affect your fixed income securities. Please refer to the trade confirmation for the relevant security or call your Financial Advisor for specific information.

Some prices, current values and income estimates may be approximations, resulting in gains and losses not being accurately reflected. Unrealized gains and/or losses are computed from the supplied cost basis data and may not be accurate for tax reporting purposes. Items for which a cost basis was not available as of the statement period ending date are indicated by the symbol N/A. The total gains and/or losses do not reflect positions which we do not have cost information. Please contact your Financial Advisor if you believe any cost basis related data is inaccurate or if you require additional information.

Estimated Annual Income ("EAI") and Estimated Yield ("EY") are estimates only and do not indicate actual income or performance of investments. EAI and EY for certain types of securities could include a return of principal or capital gains, in which case the EAI and EY would be overstated. As EAI and EY are estimates, the actual income and yield might be lower or higher than the estimated amounts. EY reflects only the income generated by an investment and it does not reflect changes in its price, which may fluctuate.

For tax reporting purposes, Fixed Income ADJUSTED COST reflects calculations using the "Straight-Line Basis" to reflect amortization of cost for Fixed Income securities purchased at a premium and/or accretion of cost for Fixed Income securities purchased at a discount. The formula is not applied to Foreign Bonds or Certificates of Deposit. In addition, call features may affect your fixed income securities. Please refer to the trade confirmation for the relevant security or call your Financial Advisor for specific information.

Cost Basis - the original amount paid for a security, including the amount of reinvested dividends and capital gains, plus or minus certain adjustments. See last page of statement for details. Total Cost Basis does not include the cost basis on core, money market or other positions where cost basis is unknown or not applicable

EAI Estimated Annual Income (EAI) & Estimated Yield (EY) - EAI is an estimate of annual income for a specific security position over the next rolling 12 months. EY is calculated by dividing the & EY current EAI for a security position by its statement closing date market value. EY reflects only the income generated by an investment; it does not reflect changes in its price, which may fluctuate. For certain types of securities, EAI and EY could include the return of principal or capital gains which would render them overstated. EAI and EY are estimates provided for informational purposes only and should not be relied on for making investment, trading, or tax decisions. There is no guarantee that your investments will actually generate the EAI or EY presented. Actual income and yield might be higher or lower. EAI and EY should not be confused with a security's 30-day Yield or 7-day Yield, if provided, as such yield quotations reflect the actual historical performance of a security. For additional information, including calculation details, refer to the "Additional Information and Endnotes" section at the end of your statement.

Total Cost Basis does not include the cost basis on core, money market or other positions where cost basis is unknown or not applicable.

E Includes exchange-traded funds (ETFs), exchange-traded notes (ETNs), and other exchange-traded vehicles.

Cost Basis - the original amount paid for a security, including the amount of reinvested dividends and capital gains, plus or minus certain adjustments. See last page of statement for details. Total Cost Basis does not include the cost basis on core, money market or other positions where cost basis is unknown or not applicable.

EAI Estimated Annual Income (EAI) & Estimated Yield (EY) - EAI is an estimate of annual income for a specific security position over the next rolling 12 months. EY is calculated by dividing the & EY current EAI for a security position by its statement closing date market value. EY reflects only the income generated by an investment; it does not reflect changes in its price, which may fluctuate. For certain types of securities, EAI and EY could include the return of principal or capital gains which would render them overstated. EAI and EY are estimates provided for informational purposes only and should not be relied on for making investment, trading, or tax decisions. There is no guarantee that your investments will actually generate the EAI or EY presented. Actual income and yield might be higher or lower. EAI and EY should not be confused with a security's 30-day Yield or 7-day Yield, if provided, as such yield quotations reflect the actual historical performance of a security. For additional information, including calculation details, refer to the "Additional Information and Endnotes" section at the end of your statement.

Total Cost Basis does not include the cost basis on core, money market or other positions where cost basis is unknown or not applicable.

Cost Basis - the original amount paid for a security, including the amount of reinvested dividends and capital gains, plus or minus certain adjustments. See last page of statement for details. Total Cost Basis does not include the cost basis on core, money market or other positions where cost basis is unknown or not applicable.

EAI - Estimated Annual Income (EAI) & Estimated Yield (EY) - EAI is an estimate of annual income for a specific security position over the next rolling 12 months. EY is calculated by dividing the current EAI for a security position by its statement closing date market value. EY reflects only the income generated by an investment, it does not reflect changes in its price, which may fluctuate. For certain types of securities, EAI and EY could include the return of principal or capital gains which would render them overstated. EAI and EY are estimates provided for informational purposes only and should not be relied on for making investment, trading, or tax decisions. There is no guarantee that your investments will actually generate the EAI or EY presented. Actual income and yield might be higher or lower. EAI and EY should not be confused with a security's 30-day Yield or 7-day Yield, if provided, as such yield quotations reflect the actual historical performance of a security. For additional information, including calculation details, refer to the "Additional Information and Endnotes" section at the end of your statement.

Total Cost Basis does not include the cost basis on core, money market or other positions where cost basis is unknown or not applicable.

This may not reflect all of your gains/losses due to incomplete cost basis.
